DETAILED ACTION

Allowable Subject Matter

Claims 1-25 allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art does not describe a user device that includes an image file that defines a single image of a custom character set including a plurality of characters, locating a selected character from the single custom character set image using associated character information, and defining a portion of the image containing the selected character and excluding at least one other of the plurality of characters, in order to render this portion on a display device.

The closest prior art, Hill et al. (US 6,870,535), describes a font file that includes a bitmapped image of each character, the font file uses a character code, glyph index, and typesetting information to locate each character image within the font file (column 5 lines 5-18 and column 6 lines 43-45). Hill's method locates a selected character from a custom character set within the font file based on associated character information, but the selected character is not located within a single image that includes multiple characters, instead Hill's method generates a separate image for each character, and retrieves the character image upon request from a user. As such, Hill also does not describe defining a portion of a single image containing the selected character and excluding at least one other of a plurality of characters, in order to render only the selected portion on a display device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
